

To Flush or Not To Flush?
The toilet is not a trash can.

Many materials that people frequently flush can harm the pipes that connect to the sewer system. The only thing you should ever flush down a toilet is toilet paper. Below is a list of items that **should NOT** be flushed:

- “Flushable” wipes
- Paper towels
- Cleaning rags & household wipes
- Feminine hygiene products
- Diapers
- Cat Litter
- Medical bandages
- Dental floss
- Q-Tips
- Medications
